

Advance notice:

The European Commission will hold the following two open events. No registration required

Towards Disaster Resilience: Reducing Risks From Technological Accidents Triggered by Natural Hazards

Monday 16 March, 9:00-12:00

At this event, experts from academia, government, the EU and international organisations will share their experiences with risk management of technological accidents triggered by natural hazards ("Natech"), current dedicated research and implementation programmes, and will discuss further needs for effective technological and Natech risk reduction.

Free of charge, Event held in English

Venue: Tohoku University Kawauchi-kita Campus A106, Sendai

Organizers: European Commission Joint Research Center, Disaster Prevention Research Institute of Kyoto University, UNEP/OCHA JEU and Asian Disaster Preparedness Centre (ADPC)

EU Cooperation to Enhance Resilience and Disaster Risk Reduction

Monday 16 March, 14:00-17:00

The European Union is developing ambitious policies and programmes on disaster risk reduction and resilience. Tools, actions and innovative approaches will be showcased. Among other themes the event will cover the indexes to support common analysis of the risks faced by vulnerable communities, the resilience compendium developed by the Directorate-General for Humanitarian Aid and Civil Protection, a joint EU-JICA project on resilience in Kenya, and the integrated EU approaches to climate adaptation, disaster risk reduction and resilience.

Free of charge, event held in English with Japanese translation

Venue: Tohoku University, Kawauchi-kita Campus Multimedia Hall, Sendai

Organizers: European Commission
